NEW KINGGEE STEEL WORKWEAR

KINGGEE IS EXCITED TO LAUNCH STEEL WORKWEAR

Designed for the man that always wants to look his best, this range will stay looking newer and smarter for longer.

KingGee Steel works because it is;

- **40% TOUGHER** than your current workwear*, this means it will take longer to wear out.
- **TRIPLE STITCHED**, seams won't come apart.
- **REINFORCED KNEE AREA**, double layer on knees provides extra protection where most needed. It also allows for the insertion of knee pads for knee protection.
- **FADE RESISTANT***, workwear will look smarter for longer.
- **ODOUR KILLING**, the shirts are treated with Neutraliser®, a Nanotex® treatment that absorbs the smell of body odour and locks it away until the shirt is washed.
- **IRON FREE**, because of the fabric these garments can be worn straight off the washing line.

* Martin Dale Abrasion test results conducted at the CSIRO show this fabric takes at least 40% longer to wear out than pure cotton fabric in the same construction. Also it is tougher to tear.

** Better results on fading in sunlight than just pure cotton fabric.

K14550 KingGee Steel S/S Shirt S-4XL
K14500 KingGee Steel L/S Shirt S- 4XL
